## 1458 Universal Quick Adhesive

Universal Quick Adhesive, #1458, is a fast-curing, urethane adhesive designed for plastic repairs. #1458 is ideal for quickly repairing bumper tabs, brackets, headlight buckets and grills. It is an excellent choice for bonding backer panels, moldings, emblems and most small plastic, metal and aluminum parts. #1458 is specially formulated for most automotive plastics, (including TPO, PP, PE) as well as metal, SMC, and fiberglass. This high strength adhesive is sandable and offers great featheredging characteristics with no pinholing.

100% Solids • 50 State Compliant • 200 ml cartridge

## 1468 Plasto-Mend Universal Plastic Repair

Plasto-Mend Universal Plastic Repair, #1468, is an epoxy-based, easy-to-sand adhesive with superior featheredging qualities. #1468 was specially designed for basic cosmetic repairs of all types of plastics including: ABS, TPO, PP, PU, and others. #1468 is also excellent for repairs to body panels, grills, composite bumpers, headlamp housings, interior plastics and more.

100% Solids • 50 State Compliant • 200 ml cartridge

## 1478 Plasto-Mend Rigid Plastic Repair

Plasto-Mend Rigid Plastic Repair, #1478, is a high strength, epoxy-based, adhesive designed to work on all rigid substrates such as PC, SMC, BMC, and fiberglass. It can be used to bond plastic to: plastic, steel, aluminum, and other rigid substrates. Most common repairs include: rejoining cracked or broken panels, sectioning rigid parts, or as a filler material for repairing cracks, holes, and gouges.

100% Solids • 50 State Compliant • 200 ml cartridge

## Plasto-Mend TPO Adhesion Promoter

Plasto-Mend TPO Adhesion Promoter is a chemical bonding prep formulated for the repair and refinishing of problem plastics. It has a unique blend of chlorinated polyolefins to promote adhesion of coatings and repair materials to PP (Polypropylene), PE (Polyethylene), TPO (Thermoplastic Olefins), and most difficult to bond plastics.

50 State Compliant

Gallon (1021-F) • 16 oz aerosol (1023-F)

## 1150 Plastic Repair Tape

A high-tack adhesive on one side makes for easy positioning of the tape. Use with Plasto-Mend Plastic Repair epoxies for additional strength and support.

50 State Compliant • 2" x 50' roll

## 1394 Anti Static Degreaser

Transtar's Anti Static Degreaser is a specially formulated, water-based degreaser that can be used on all plastics, metal and pre-painted parts. Its unique mix of alcohol, surfactants and water make it ideal for cleaning and degreasing plastics prior to painting or priming. Anti Static Degreaser also reduces the amount of dust contact by neutralizing static charge. Compliant across North America.

50 State Compliant • Quart
